

1055-ES OUTDOOR MASK-A-WAY

SPECIALTIES FOR MAINTENANCE AND SANITATION SINCE 1947

NEW FROM DELTA FOREMOST — A WATERPROOF PROTECTIVE MASK THAT STANDS UP IN THE RAIN EXCELLENT FOR OUTDOOR USE.

Partially protected surface with paint overspray.

Apply FM 1056-ES Mask Off to remove overspray.

Simply rinse or pressure wash.

- *Pamper and Protect Your Heavy Equipment. It Works Hard For You — Take Care Of It!*
- *Turn Repaints and Major Refurbishing Of Your Rental Equipment Into A Thing Of The Past.*

Ideal for cranes, cherry pickers, scissor lifts.

SAVE THOUSANDS IN REPAINT COSTS! Never again will you repaint a piece of equipment due to paint overspray or other contamination. Just one application of FM 1055-ES Outdoor Mask-A-Way lays down a protective, durable Acrylic film to shield your existing paint and prevent paint overspray from adhering. A simple wash with FM 1056-ES Mask Off or a similar product after the job removes the film and restores your equipment to like new condition.

YOUR RENTAL EQUIPMENT will never need to be stripped and repainted again! For just a few dollars investment, you can avoid thousands of dollars in repaint costs. Make money on rentals to paint contractors. Keep your equipment in the field and out of the paint shop.

IMPERVIOUS to rain, snow, sun or any other weather conditions when used according to directions. Blocks out paint overspray and solvents. Outdoor Mask-A-Way stays on until you remove it with FM 1056-ES Mask Off or a similar product and pressure washer rinse.

EASY TO APPLY — Apply with our 8347 Dry Mask Spray Gun or any conventional paint spray equipment.

Outdoor Mask-A-Way Is Indispensable For:

- Cranes
- Scaffolds
- Other Heavy Rental Equipment
- Scissor Lifts
- Cherry Pickers

TECHNICAL DATA

FOREMOST 1055-ES OUTDOOR MASK-A-WAY

Rev. 03-19-98

DESCRIPTION: A transparent, pink-tinted, sprayable, acrylic resin masking compound that dries to a tough, durable film and allows easy removal of paint overspray. Foremost 1055-ES Outdoor Mask-A-Way coats and seals surfaces from the damaging effects of paint overspray and other solvent based materials. It is economical because it eliminates the need to repaint and refurbish rental equipment.

APPLICATION: It is designed for use as a masking compound to protect heavy machinery and other surfaces from paint overspray. Foremost 1055-ES Outdoor Mask-A-Way is used to protect plastic, cured paint, metal, vinyl, fiberglass, and any nonabsorbent surfaces.

DIRECTIONS: **NOTE:** Do not apply to freshly cured paint or any highly absorbent surface such as cloth tops.

1. Brush or blow off any loose material from the surface.
2. Apply a single heavy coat of FM 1055-ES, using a FM 8347 Dry Mask Spray Gun, gravity gun, HVLP cup gun or pressure pot, to all areas of the equipment including vehicle engine compartment (if necessary). Apply an extra coat to tires and any other rubber or vinyl surfaces which might absorb some of the material.
3. Allow 25 to 30 minutes for FM 1055-ES to dry. Drying may be slower at lower temperatures or in areas of poor air circulation. The use of heat or fans will speed dry time.
4. Inspect the masked area for any unprotected spots and touch up with FM 1055-ES as needed. Allow to dry.
5. For removal, flood the surface with FM 1056-ES Mask Off or a similar product, and allow to sit for up to thirty minutes to soften the FM 1055-ES. Then, rinse the equipment with a hot pressure washer. This will remove the 1055-ES and paint overspray from the surface, and return equipment to original condition.

PRECAUTIONS: **KEEP OUT OF REACH OF CHILDREN:** Do not take internally. May be harmful or fatal if swallowed. If ingested get immediate medical attention. Avoid contact with skin and eyes.

FIRST AID: EYES: Flush with large amounts of water, lifting upper and lower lids occasionally. Get medical attention. **SKIN:** Wash thoroughly with soap or mild detergent and water. **INGESTION:** Do not induce vomiting. Get immediate medical attention.

Before using this product, read the Material Safety Data Sheet (MSDS) for more detailed information regarding safe handling.
