TECHNICAL DATA

FOREMOST 5578-ES STAIN ACTION FABRIC BRIGHTENER

Rev. 12-19-13

DESCRIPTION: A high quality, non-chlorine, powdered synthetic fortified with alkaline detergent. Foremost 5578-ES Stain Action removes highly resistant stains. Whitens and brightens.

APPLICATION: Recommended for removal of the following stains: shoe polish, lipstick, blood, bar-b-que sauce, coffee, tea, wine, urine, nicotine, juice, Kool-Aid®, grease and many others.

Foremost 5578-ES Stain Action Fabric Brightener can be used on any colorfast fabric, white or colored, natural or synthetic; in any kind of water, hard or soft.

DIRECTIONS: **PRESOAK: FOR DIFFICULT STAINS:**

1. Half fill container with tap water and add one cup of Stain Action (6 ounces by weight) per gallon of water. An easy method of dosing is to mix two scoops of powder with every five gallons of water used. Use the plastic scoop that comes with the container of Stain Action.
*Because of high initial sudsing, use a container that would hold at least twice the volume of liquid used. Initial high suds will drop. Stain removal function will continue.
2. Soak 24 hours or more. Items may remain in the solution as long as necessary.
3. Wearing rubber gloves, wring fabric thoroughly over tank to save solution.
4. Put fabric through regular wash cycle. Make sure washer chlorine bleach feeder is turned off.
5. Some solution volume will be lost due to drag-out. Sweeten tank when reusing by adding 2-4 ounces of Stain Action per gallon of water.

FOR WASHLOAD CLEANING: To maintain fabric brightness, add 2-4 ounces ($\frac{1}{4}$ - $\frac{1}{3}$ ounce per gallon of water) along with normal detergent. **Do not use with chlorine bleaches.**

PRECAUTIONS: **KEEP OUT OF REACH OF CHILDREN.** Eye irritant. Harmful if swallowed. Contains sodium carbonate peroxyhydrate. Avoid contact with eyes and mucous membranes, and prolonged contact with the skin.

FIRST AID: EYES: Flush with water for 15 minutes. Get medical attention promptly. **SKIN:** Flush with water. **INGESTION:** Give milk or water. Do not induce vomiting, call a physician.

Before using this product, read the Material Safety Data Sheet (MSDS) for more detailed information regarding safe handling.

FOR COMMERCIAL AND INDUSTRIAL PURPOSES ONLY.
